PROFILE

Odoo Developer with 2 years of hands-on experience building and customising modules in Odoo. Solid foundation in Python, PostgreSQL and REST API integrations. Delivered three freelance projects that automated CRM, Sales and Inventory workflows for SMEs, cutting manual data entry by up to 25 %. Quick-learning, detail-oriented and an active contributor on Odoo Community forums. Fluent in Arabic & English; open to both remote and on-premise jobs.

WORK EXPERIENCE

Freelance Odoo Developer & Full-Stack Web Developer   **Jan 2024 – Present**
Remote & client-site

- Customised Odoo for three SMEs (retail, fitness, digital-marketing), automating CRM, Sales and Inventory workflows and cutting reducing manual data entry.
- Built four custom modules (lead scoring, commission calculator, WhatsApp alerts, Stripe payment sync) with Python, XML, JavaScript, maintaining 90 % unit-test coverage using pytest.
- Integrated Stripe, PayPal and Aramex APIs, enabling online payments worth AED 400 k+ with zero downtime.
- Developed responsive portals in React / Next.js & Tailwind CSS serving 1 500+ monthly active users; achieved 90+ Google Lighthouse scores.
- Containerised deployments with Docker and automated CI/CD via GitHub Actions, shrinking release cycles from 1 day to 30 minutes.

HIGHLIGHTED PROJECTS

- Gym Membership Portal – React + Odoo; real-time check-in dashboard, supports 600 active members.
- E-commerce Platform – Next.js storefront fully synced with Odoo.
- Custom Sales Dashboard – Odoo-embedded KPI board tracking lead funnel.
- Chery Algeria Website (a major Chinese automaker in Algeria) - Fully built and synced with Odoo.

TECHNICAL SKILLS

- ERP / Odoo: Odoo v16-v18, custom module development, XML/qWeb views, ORM, Studio, Odoo.sh.
- Languages & Frameworks: Python (core & Odoo APIs), JavaScript / TypeScript, React, Next.js, Node.js (REST APIs, 1 project).
- Databases: PostgreSQL (advanced queries, PL/pgSQL functions, indexing), pgAdmin.
- Integrations & APIs: REST, GraphQL fundamentals, Stripe, PayPal, Aramex, WhatsApp Cloud API.
- DevOps & Tools: Docker & Docker-Compose, Git, GitHub Actions CI/CD, Linux server admin, Nginx.
- Testing & QA: pytest, Odoo unit tests, Postman.
- Front-end: Tailwind CSS, HTML5, CSS3, responsive design best practices.
